EDUCATION

CUNY Brooklyn College

Bachelor of Science in Computer Science

Expected May 2026

New York, NY

- **GPA:** 3.6/4.0
- **Relevant Coursework:** Data Structures & Algorithms, OOP, Databases, Computer Architecture, AI.

EXPERIENCE

Software Engineer Intern

Soaper

June 2025 – Present

Remote

- Built and improved full-stack features using React and FastAPI, contributing to measurable improvements in frontend latency and API response times.
- Implemented a multi-parameter radiology search feature using indexed database queries, improving response times and supporting large datasets.
- Created reusable UI components in React and TypeScript, improving consistency and reducing development time for similar features.
- Collaborated with physicians and healthcare professionals in an Agile environment to translate clinical workflows into intuitive software features.

Infrastructure QA Engineer Intern

NYC Department of Education – Division of Instructional and Information Technology

May 2025 – August 2025

New York, NY

- Deployed and configured servers, IP-based systems, and desktop images across NYC schools.
- Diagnosed hardware/software issues and executed on-site audits across 5 boroughs.

PROJECTS

SoaperNote | *React, Tailwind CSS, FastAPI, Firebase, Stripe*

- Built a full-stack clinical notes application with AI-powered transcription and SOAP templates using React, FastAPI, and Firebase, focusing on healthcare data handling and privacy-aware design.
- Implemented client-side encryption using WebCrypto to follow security best practices and protect sensitive user data.
- Built modular FastAPI services using versioned routes and Pydantic schemas to improve code organization, validation, and maintainability.

Scorva | *React, Tailwind CSS, Node.js, PostgreSQL, OpenAI, Jest*

- Built and deployed a full-stack sports analytics application using React, Node.js, and PostgreSQL to process and display large sports datasets.
- Integrated OpenAI to generate game summaries and added caching to reduce repeated requests and API usage.
- Developed and tested REST APIs with Jest by writing automated tests to validate routes, database operations, and data transformations.

Sirat | *React Native, Expo, Node.js, OpenAI, Google Places API*

- Built a cross-platform Islamic mobile app featuring prayer times, Qibla compass, Quran audio, mosque discovery, and AI-powered dua search.
- Organized a monorepo with a React Native frontend and Node.js backend, deploying the API on Railway and managing secure environment variables.
- Added offline support using AsyncStorage to cache prayer data, user preferences, and Quran progress for a smoother user experience.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Java, Python, C++

Backend: Node.js, Express, FastAPI, PostgreSQL, SQLAlchemy, REST APIs, Jest, CI/CD, AWS, Azure

Frontend: React, React Native, Expo, Tailwind CSS

Tools & Platforms: Git, GitHub, Vercel, Railway, Firebase, Stripe, OpenAI
